Dear Hiring Manager,

I hope you're doing well. As a Computer Science graduate with a strong foundation in backend development, cloud computing, and software engineering, I am eager to contribute my skills and grow in a dynamic and innovative environment.

With experience in Java, .NET, Python, and cloud technologies, I have worked on developing, testing, and deploying scalable applications using RESTful APIs, Agile methodologies, and modern frameworks. My projects have included building machine learning models for data analysis, developing web applications with Flask and MongoDB, and optimizing databases with SQL. Additionally, my internships have provided hands-on exposure to software development life cycle (SDLC), project management, and debugging complex systems.

I am particularly drawn to opportunities where I can apply my problem-solving skills and technical expertise to create impactful solutions. I thrive in collaborative environments and am always eager to learn new technologies and contribute to high-performing teams.

I would love the opportunity to discuss how my skills align with your team's goals. Please feel free to reach out at your convenience. Looking forward to connecting!

Best regards,
